

The Corporate Transactions Group provides comprehensive transactional and technical expertise on matters including master services agreements, data licenses, cloud computing, SAAS agreements, liability clauses and maintenance agreements. We have assisted technological companies, public and privately held companies. Our attorneys provide knowledge intensive solutions and service to companies looking for help with negotiations, agreements, and licensing. The attorneys in our Corporate Transactions Group have represented Fortune 500 companies in transactional and technology matters.

We have advised and provided legal guidance related to regulatory compliance from a contracting standpoint for our fintech clients which includes an understanding of the legal, ethical, and practical risks involved in the related transactions. We focus on complex and evolving laws and regulations that govern everything that happens in connection with data transmitted and stored on computers, including consumer protection laws, privacy laws, and e-discovery issues. We provide legal advice on issues such as cyber security, online privacy, data mining, data breach protocols, and the law as it relates to web technologies, mobile platforms, emerging technologies, information technology, e-commerce, e-business, mobile payments, competitive intelligence, and trade secrets.
